

REMOTE ADMINISTRATION, AUTOMATION, & DELEGATION

“THE” IT SCENARIO

Today’s Business demands challenge the IT department like never before. Demand from Consumers and Business Operations has transformed the IT Department from a competitive advantage to a cost center. IT Teams need to produce more and produce it faster to meet an ever growing demand. CIO’s need a secret weapon to multiply productivity without multiplying the budget. They need a RAADical Solution to Automate IT processes, remove the interdependence between key personnel, and do it in a way that conforms to their operations model.

RAAD: A SOLUTION AS SIMPLE AND UNIVERSAL AS THE 4 OPERATIONS

The **RAAD** Solution provides everything you need to Automate, Administrate, and Execute any IT related task in an Auditable Access Controlled environment. **RAAD** combines the benefits of Automation with the security of Access Control to simplify complex IT processes, remove the interdependencies of specialized personnel, and streamline your existing workflow for faster delivery.

Use our customizable modules to Automate anything from a single IT process to the most complicated data centers. Then remove the interdependence of IT without violating security protocols or compliance by using our Web-based Solution to Delegate executable tasks and access using the “least privilege” security model.

Our Agentless/Clientless solution is platform agnostic, self-contained, scalable, easy to integrate. and configures to adpt to your IT Operation.

 Distribute Tasks

 Multiply Productivity

 Increase Security

 Reduces Overhead

 Maximum IT Performance

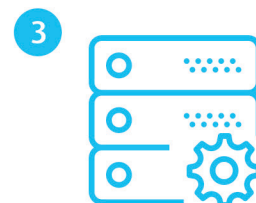

AUTOMATION THROUGH DELEGATION: HOW THE RAAD SOLUTION WORKS

1 Admins create customizable user profiles that implement the “Least Privilege” security model

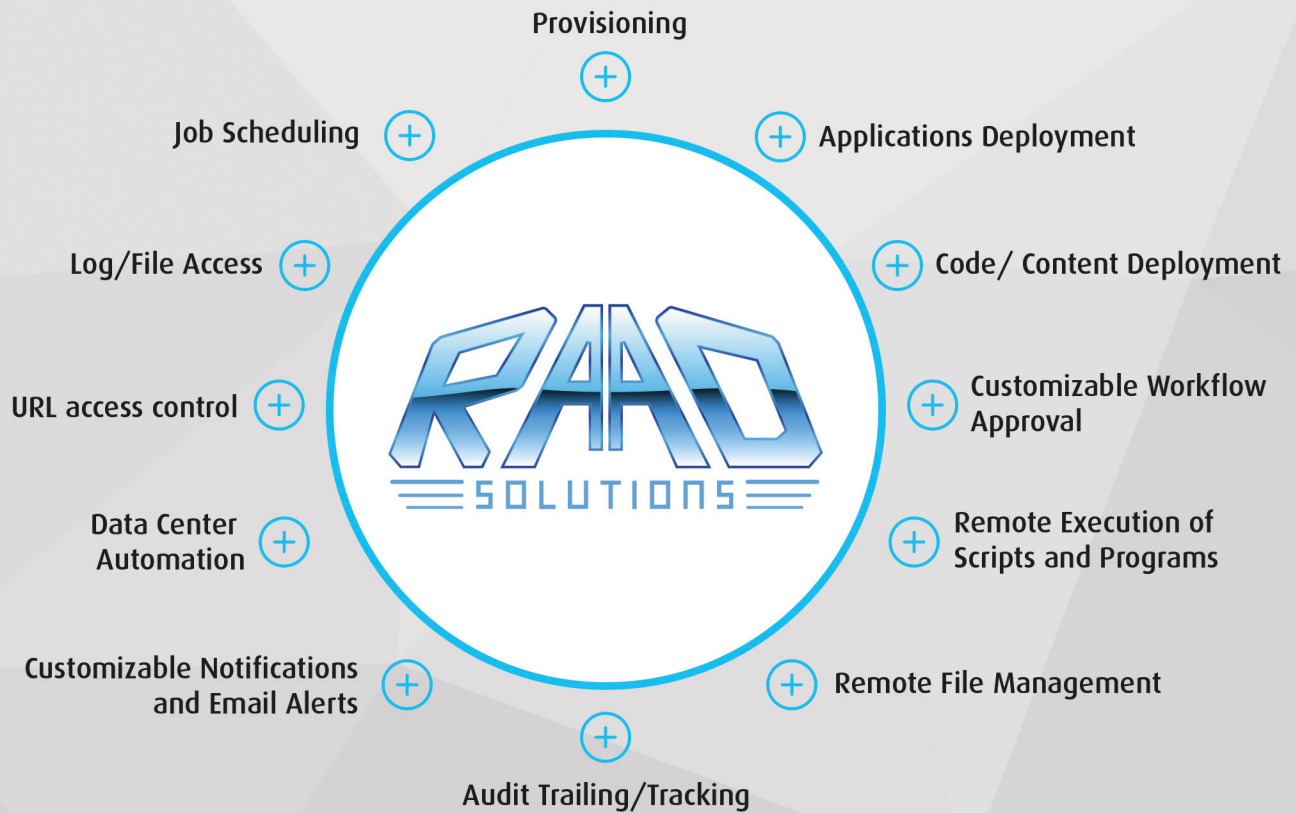

2 An authenticated User Logs into the RAAD Application to use the privileges assigned to their profile

3 IT processes are delegated directly to the qualified individuals through RAAD. Maintaining internal security protocols and compliance.
